

JAYANTH KUMAR N

jayanthkumarn870@gmail.com | +91 8867353499 | GitHub | LinkedIn | Bengaluru

Skills

- **Web:** HTML, CSS, JavaScript, React.js
- **Databases:** MySQL, MongoDB
- **Version Control:** Git, GitHub
- **Machine Learning:** Python, TensorFlow .
- **Data Visualization:** Tableau, Power BI
- **Additional Skills:** Data Structures & Algorithms, OOPs, Java

Projects

- **Responsive Travel Explorer Website:** Developed a responsive travel website developed using HTML, CSS, JavaScript, with live images and weather data using APIs. Hosted on GitHub Pages.
- **ScanGluco – AI & OCR-Based Diabetes Monitoring Application :** Used Tesseract, EasyOCR for text extraction from scanned documents. Integrated a PyTorch classifier to categorize extracted outputs, simulating industrial document processing.
- **Pneumonia Detection :** I created a deep-learning model that can look at chest X-ray images and determine whether a patient might have pneumonia. I built it using CNN in keras and trained it until it reached accuracy.

Education

- **APS College of Engineering, Bengaluru** (Dec 2022 – Expected 2026)
B.E in information Science and Engineering | Current GPA: 8.10/10.0

Certificates

- **Python:** Completed Python Programming course on Infosys Springboard, demonstrating proficiency in core programming concepts. [**Credential**]
- **AICTE-Front-End Web Development:** Certified in Front-End Web Development by Edunet Foundation in collaboration with AICTE. [**Credential**]
- **AICTE-Edunet MERN Stack Web Development Training:** Completed the “Building Modern Web Applications with MERN Stack” course under the Next Gen Employability Program. Gained practical experience developing full-stack web applications using MongoDB, Express.js, React, and Node.js. [**Credential**]

Others

- Led the organization of the Prompt Warriors event at college, managing participant coordination and event logistics effectively.
- Actively participated in various college hackathons and coding competitions.
